Advanced Certificate Program in Electric Vehicle

The Advanced Certificate Program in Electric Vehicles by iHUB DivyaSampark, IIT Roorkee and Intellipaat is designed to help you master the concepts of electric vehicle design and technology. You will learn about the fundamentals of electric vehicles, batteries, electric vehicle subsystems, charging infrastructure, and much more in this course. You can deepen your understanding of the field with the aid of pertinent case studies and projects related to your industry. The best part is that this will be carried out under the direction of renowned IIT Roorkee faculty.

Hottest Job of 21st Century

50Mn Job Postings

EV industry may create 50 mn indirect jobs by 2030

Skill Development

Electric Vehicle Professionals are equipped with various relevant skill, fetching lucrative job offers

Growing Industry

The electric vehicle market is projected to grow at a CAGR of 24.3%

Future-oriented Career

Electric Vehicle sector is a budding field; a head start will prove to be beneficial

Popular Degree

You must possess a Bachelors Degree with relevant skills to work in this domain

High Demand

The EV ecosystem needs more than 100,000 Skilled Professionals

Intellipaat Credentials

10 Million+

Aspiring Active Students

1,000+

Countries' Learners

About Program

This advanced course, created by IIT Roorkee faculty, aims to deepen your understanding of electric vehicle design and other related ideas while also bringing you up to speed. The purpose of this course is to produce the next wave of EV designers who will advance the field of vehicle design.

Learning Format

Online Bootcamp

6 Months

Live Classes

Career Services

by Intellipaat

Advanced

Certification

Key Highlights

- ✓ 50+ Live sessions over a period of 6 months
- ✓ One-on-One interaction with mentors
- ✓ Learn from IIT Roorkee faculty & Industry Experts
- ✓ No cost EMI available
- ✓ Career Services by Intellipaat
- ✓ Free Career Counselling by Intellipaat
- ✓ Exclusively Curated Projects
- ✓ 24*7 Support by Intellipaat
- ✓ Designed for working professionals and freshers
- ✓ Dedicated Learning Management Team
- ✓ Soft Skills Essential Training

Program Pedagogy

Instructor-led Training

Get trained by top industry experts

Dedicated Learning Management Team

To help you with your learning needs

Self-paced videos

Learn at your own pace with world-class content

Projects and Exercises

Get real-world experience through projects

Hackathons

Get a sense of how real projects are built

Peer Networking and Group Learning

Improve your professional network and learn from peers

Gamified Learning

Get involved in group activities to solve real-world problems

1:1 Personalized Learning

Hands-on exercises, project work, quizzes, and capstone projects

Who Can **Apply for the Course?**

- ✓ Freshers and Engineering Graduates
- ✓ Mechanical and Automotive Engineers
- ✓ Systems and Network Professionals
- ✓ Electrical Engineers
- ✓ Computer Science Engineers
- ✓ Non-IT professionals aiming to venture into the novel field

Application **Process**

The application process consists of three simple steps. Candidates have to submit their application. An offer of admission will be made to the selected candidates, and their application will be accepted upon the payment of the admission fee.

Learning Path

modifier_ob.select = 0
```

Module 1

Vehicle Fundamentals

- Basics of Electro mobility [Pure EV, Hybrid, Plug-In Hybrid]
- EV and IC engine- pros, cons
- EV powertrain architecture
- Vehicle Performance

Module 2

Mechanical sub-system of an EVs

- Steering system and dynamics
- Suspension system and dynamics
- Thermal management
- Gear and transmission Systems
- Braking systems
- Chassis design
- Turbulence
- Design against vibration
- Wheel and tyre dynamics

Module 3

Low voltage system for EVs

- Sensor interfaces
- Electronics for EV testing
- Infotainment system
- Vehicle to vehicle communication system
- Electronic Control unit
- Publishing Odometry data from sensors
- Odometry Modelling
- Role of odometry in path planning of autonomous vehicles

Module 4

EV Motors and speed control methods

- Motor ratings
- EV/HEV motor requirement
- Types of Motors: IM, PMSM, SyRM, PMBLDC, SRM
- Torque and speed control: IM, PMSM, SyRM
- Torque and speed control: SRM, PMBLDC
- Motor drives and converters used in EVs
- Lab exercises (2 hrs)

Module 5

Battery Fundamentals & BMS

- Battery modeling advantages and Disadvantages
- Characteristics of battery cell
- Battery sizing
- Introduction and objective of BMS
- Charging and discharging control
- Understanding of SOC, Cell balancing
- BMS topologies
- SoC estimation
- Protection and battery management system logic Development

Module 6

Charging Infrastructure

- Battery Charging methods
- EV supply equipment (EVSE), EV battery chargers components
- Charging infrastructure challenges
- Classification based on charging levels (region-wise), modes, plug types
- Standards related to: connectors, communication protocols, supply equipment
- Converters used in EV chargers
- Communication protocol/procedures for BHARAT DC001
- Communication protocol/procedures for CCS2 charger
- Lab exercises (3 hrs)

Module 7

Charging Stations and Scripting

- Charging station components
- Topologies and strategies used in fast chargers
- Renewable integration
- Solid state transformer
- DC/DC Converter Modelling and Simulation
- AC/DC Converter Modelling and Simulation
- Design and simulation of AC and DC charge controller
- Lab exercises (3 hrs)

Module 8

Autonomous Planning and Control of EVs

- Autonomous Vehicle Kinematics and Constraints
- Control to reference position and pose
- Control of autonomous vehicle using kinematics
- Lateral Vehicle Dynamics

Program Curriculum

- Steering Control for Automated Lane Keeping
- Cruise Control in Autonomous Vehicles
- Perception in autonomous vehicles
- Layers of Motion Planning for autonomous vehicles
- Motion Planning Primitives and Planning Scenarios
- Path planning methods
- Collision avoidance
- Co-operative control-based planning
- Lab exercises (2 hrs)

Module 9

Testing for Electric Vehicle

- Testing – Penetration Testing, Thermal Testing, Non-Destructive Testing.

Module 10

Quality Assurance

- Battery Systems
- Functional and Performance Testing
- Reliability and Durability
- Safety Standards and Regulations

Job Readiness

- Job Search Strategy
- Resume Building
- LinkedIn Profile Creation
- Interview Preparation Sessions by Industry Experts
- Mock Interviews
- Placement opportunities with 400+ hiring partners upon clearing the Placement Readiness Test.

Skills to Master

- | | | | |
|------------------------|--------------------------|---------------------------|--------------------------|
| • Vehicle Fundamentals | • Battery Technology | • Battery Sizing | • Battery Management |
| • MATLAB Simulink | • Mechanical sub-systems | • Charging Infrastructure | System (BMS) Development |
| • Low-voltage Systems | • Testing of EVs | | |

Tools to Master

Course Projects

Projects cover the following industries:

Retail

Social Media

Supply Chain

Entrepreneurship

E-commerce

Banking

Healthcare

Insurance

Beginner

Range Simulation

Using MATLAB creates an EV range simulation for estimating the range of the EV considering the fundamentals of vehicle dynamics, mechanical subsystems of EV, etc.

Beginner

Motor Simulation

Linear controller design for electric machine system using MATLAB Simulink, and Space vector modeling of induction machine and vector control using MATLAB Simulink

Beginner

Battery Pack Simulation

Simulate the battery pack using simulink and access the battery optimization and performance w.r.t the various input parameters.

Intermediate

Battery Management System Design

Implement a battery management system using MATLAB for assessing charge using Soc algorithm and other algorithms for battery operations.

Intermediate

Charging Infrastructure Design

Single-phase AC-DC converter simulation for 3.3kW On-board charger using MATLAB Simulink and Isolated DC-DC converter simulation for 3.3kW On-board charger using MATLAB Simulink.

Advance

EV Testing

Perform penetration, thermal, and Non-destructive testing to evaluate operating range and other significant metrics for the electric vehicle in a simulation.

Course Advisors / Faculty

Manish Anand

CEO at iHUB IIT Roorkee

Manish Anand is an IIT Kanpur alumnus with an MBA in Technology and innovation management from Korea Advanced Institute of Science and Technology (KAIST), Seoul. He currently heads iHUB DivyaSampark, a Technology Innovation Hub hosted at IIT Roorkee.

Dr. Sudeb Das Gupta

Professor at IIT Roorkee

Dr. Sudeb Dasgupta is currently working as Professor at IIT Roorkee. He has completed his PhD from Banaras Hindu University in Electronics Engineering and has more than 20 years of teaching experience.

Dr. Premalata Jena

Associate Professor at IIT Roorkee

Dr. Premalata Jena is currently working as an associate professor at IIT Roorkee. She completed her Ph.D. from IIT Kharagpur and has more than 10 years of teaching experience.

What Makes Us **Tick**

Career-oriented Sessions

Attend 25+ career-oriented sessions by industry mentors and plan your career trajectory

Profile Building

Craft a electric vehicle design and analysis resume and LinkedIn profile and make an impression on top employers

Mock Interview Preparation

Prepare with mock interviews including most asked questions by top employers

1:1 Mentoring Sessions

Get 1:1 guidance at every step in your career transition to electric vehicle design and analysis

Placement Assistance

Placement opportunities are provided once the learner is moved to the placement pool upon clearing Placement Readiness Test (PRT).**

Dedicated Job Portal Access

Get exclusive access to 200 job postings per month on Intellipaat's job portal

Job Fairs

Job fairs are conducted regularly to introduce learners to major organizations

Hackathons

Work in teams and get exclusive access to hackathons

Program Partners

About Intellipaat

Intellipaat is one of the leading online training providers with more than 10 million learners in over 155 countries. We are on a mission to democratize education as we believe that everyone has the right to quality education.

We create courses in collaboration with top universities and MNCs for employability like EICT IIT Roorkee, EICT IIT Guwahati, IITM Pravartak, IIM Ranchi, IIT Jammu, IU, LSBU, University of Essex, University of Liverpool, IBM, Microsoft, etc.

Our courses are delivered by SMEs & our pedagogy enables quick learning of difficult topics. 24/7 technical support & career services help learners to jump-start their careers.

About iHUB DivyaSampark, IIT Roorkee

iHUB DivyaSampark, IIT Roorkee aims to enable an innovative ecosystem in new-age technologies like AI, ML, Drones, Robots, and data analytics (often called CPS technologies). It aims to do this by promoting and enhancing core competencies, capacity building, and manpower training to provide solutions for national strategic sectors and become a significant contributor to Digital India.

Achievements – IIT Roorkee:

- Ranked 7th 'Overall' and 6th in 'Engineering' in India as declared by NIRF 2022
- Ranked 175th in the world for 'Engineering and Technology' by QS World University Rankings 2023
- Ranked as the 369th best institute in the world by QS World University Rankings 2023
- Ranked as the 114th best institute in Asia by QS World University Rankings 2023

Upon the completion of this program, you will:

- Certification from iHUB DivyaSampark, IIT Roorkee

10 Million Learners & 500+ Corporates across 155+ countries
upskilling on Intellipaat Platform
